

DATA USE DOCUMENTATION

Triage Guideline Source

- **Source:** Manually compiled from the official GHS [National Safe Motherhood Protocol \(Revised Edition\)](#).
- **Description:** A specialized multilingual dataset mapping core clinical warning signs (such as postpartum hemorrhage, pre-eclampsia, convulsions, sepsis) directly to urgency triage labels (LOW, MEDIUM, HIGH).
- **Role in Project:** Acts as the semantic clustering constraints for the Guideline-Driven Few-Shot Fine-Tuning (GDF-FT) paradigm.
