

MAMACARE AI

Supporting maternal care with AI
June 2026

PROBLEM AND CONTEXT

“800 women die every day from preventable causes related to pregnancy and childbirth.”

The Care Gap

Maternal deaths don't happen at a single moment. They are the result of missed signals across the entire journey.

1 in 3 women in rural Sub-Saharan Africa has mobile internet.

 **have access to basic phone (GSM Voice with SMS)**

Meet Abena!

receives little to no *continuous structured support between clinic visits* leading to unseen physical and mental health crises

***WHO Maternal mortality fact sheet 2025**

***GSMA Mobile Internet Connectivity 2023**

***GSMA Mobile Gender Gap 2023**

SOLUTION

MamaCare AI

A Voice based Conversational AI Agent for prenatal risk monitoring and support for perinatal loss mothers (Zero-Friction Innovation).

For Pregnant Women

 Scheduled, automated check-in calls to track and monitor maternal health risk

 Support for Local Language

 Offline-first, No App, Continuous support from health provider

For Perinatal bereaved Mothers

 Counselor Support Services and AI Powered Mental Wellness resources

 Scheduled check-ins for the bereaved mother

SOLUTION

Clinical Dashboard (Core Saas Component)

TARGET AND VALUE PROPOSITION

PREGNANT & PRENATAL LOSS
MOTHERS

VALUE

- Regular Voice Check
Ins – no app needed
- Continuous Symtoms
Monitoring

HEALTH INSTITUTION

VALUE

- AI triages routine cases
- Effective Digital Records

DISTRIC HEALTH ADMIN
AND GOVERNMENT

VALUE

- Realtime KPI for analytics
- Exportable reports for
Planning

IMPACT

SDG Alignment

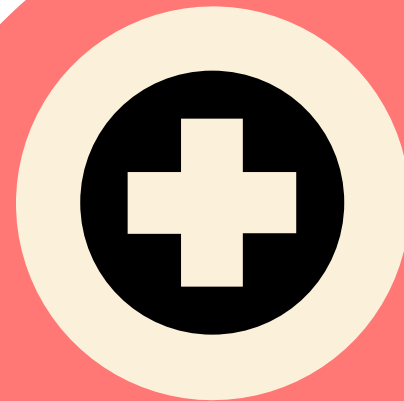

3 GOOD HEALTH
AND WELL-BEING

5 GENDER
EQUALITY

10 REDUCED
INEQUALITIES

Reduced Maternal Mortality

MM reduced with timely and continuous care. Voice Agent check-ins catches danger signs between visits before they're fatal.

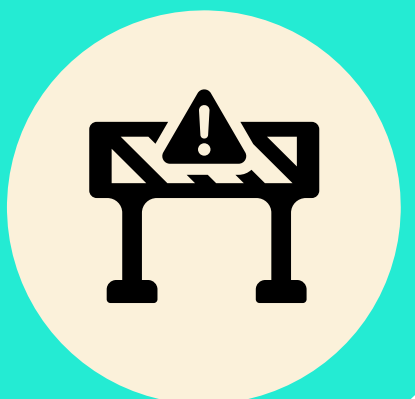

Increased Maternal Health Service Productivity

Our system enables the health institutions manage large number of prenatal mothers at an increased efficiency

Bridges Infrastructure Barrier

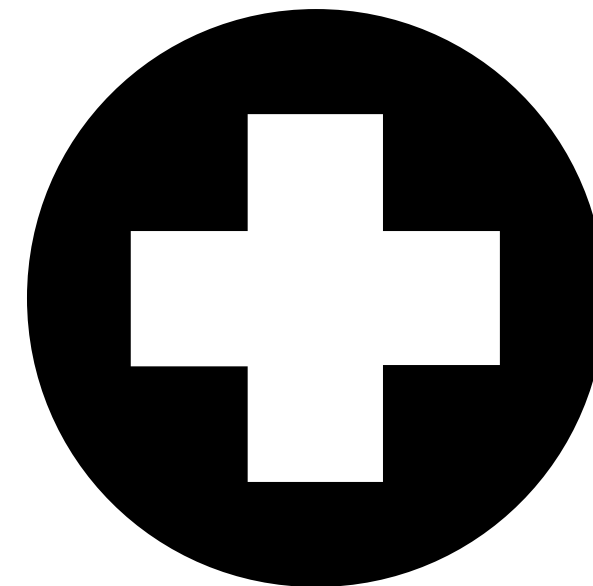

Over 90% GSM reachable. Continuous Maternal Care accessible to anyone irrespective of geographical location and resource

NEXT STEPS: SCALABILITY AND SUSTAINABILITY

**Implement language
support with selected
languages
(Twi, Fante, Ga, Dagbani)**

**Integration into the Ghana
Health System**
